Life Systems is specialised in the production of systems for more comfort and safety in every day life.

Lissi is the interactive assistance system for today! Operation is with the familiar TV. It uses the status display in the colors „gree“, „yellow“, „red“. While on standby or by pressing the „Help“ key, one can also send an SMS.

Combine the advantages of a simple to use TVreceive with communication with your friends and family. With the use of a remote control you can view all options of Lissi.

By monitoring the daily activities of the user, like watching TV or by confirming a reminder, one can judge whether all is well.

Get news from the worlds or messages from your loved ones, all without a computer.

Share with your friends when you are on the road or when you are back home.

The personalized reminder function accompanies you through the daily routine.

What is the weather going to be like? Receive updated weather reports for your area.

Features for Lissi Home:

- Watch TV with a easy to use menu
- Receive text messages from your friends
- Reminderfunktion (alarm, medication, hydrate, quote of the day)
- Updated weather forecast
- Absence message
- Headlines
- Clock with large display
- Lissi status display

Lissi is connected like a regular TV and enables communication with the outside world with a internet connection.
